SEBI • EQUITY DERIVATIVES • ONE FINANCIAL YEAR

₹91,685 crore

lost by individual traders in India last year; most of it by people learning to trade with real money.

87.7%

of them lost money

₹1.17 lakh

average loss per trader

78.6 lakh

people. In one year.

THE PROBLEM

The youngest traders lose the most.

43%

of India's F&O traders are now under 30; up from 31% in FY23

89%

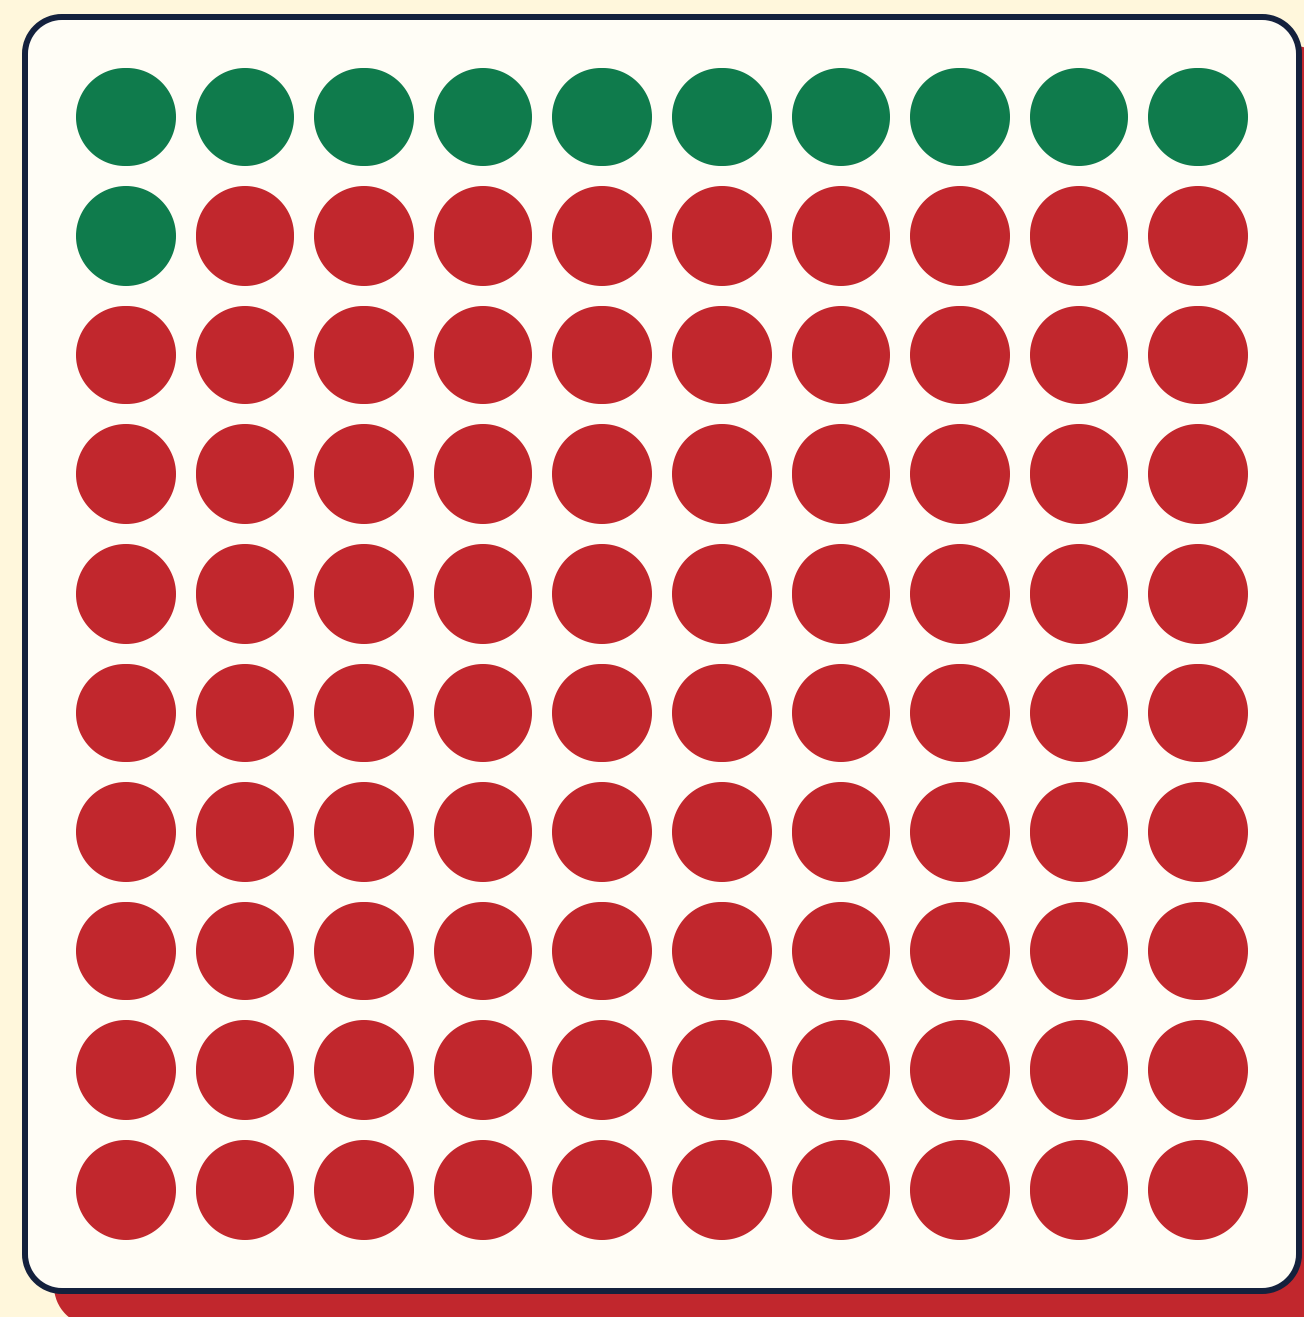

of those under-30s lost money; worse than any other age group

73%

earn under ₹5 lakh a year. They are learning on money they cannot afford to lose.

74% of Indians who don't invest say the market is too complex. They don't need another video. They need a place to practise.

100 TRADERS UNDER 30, ONE YEAR

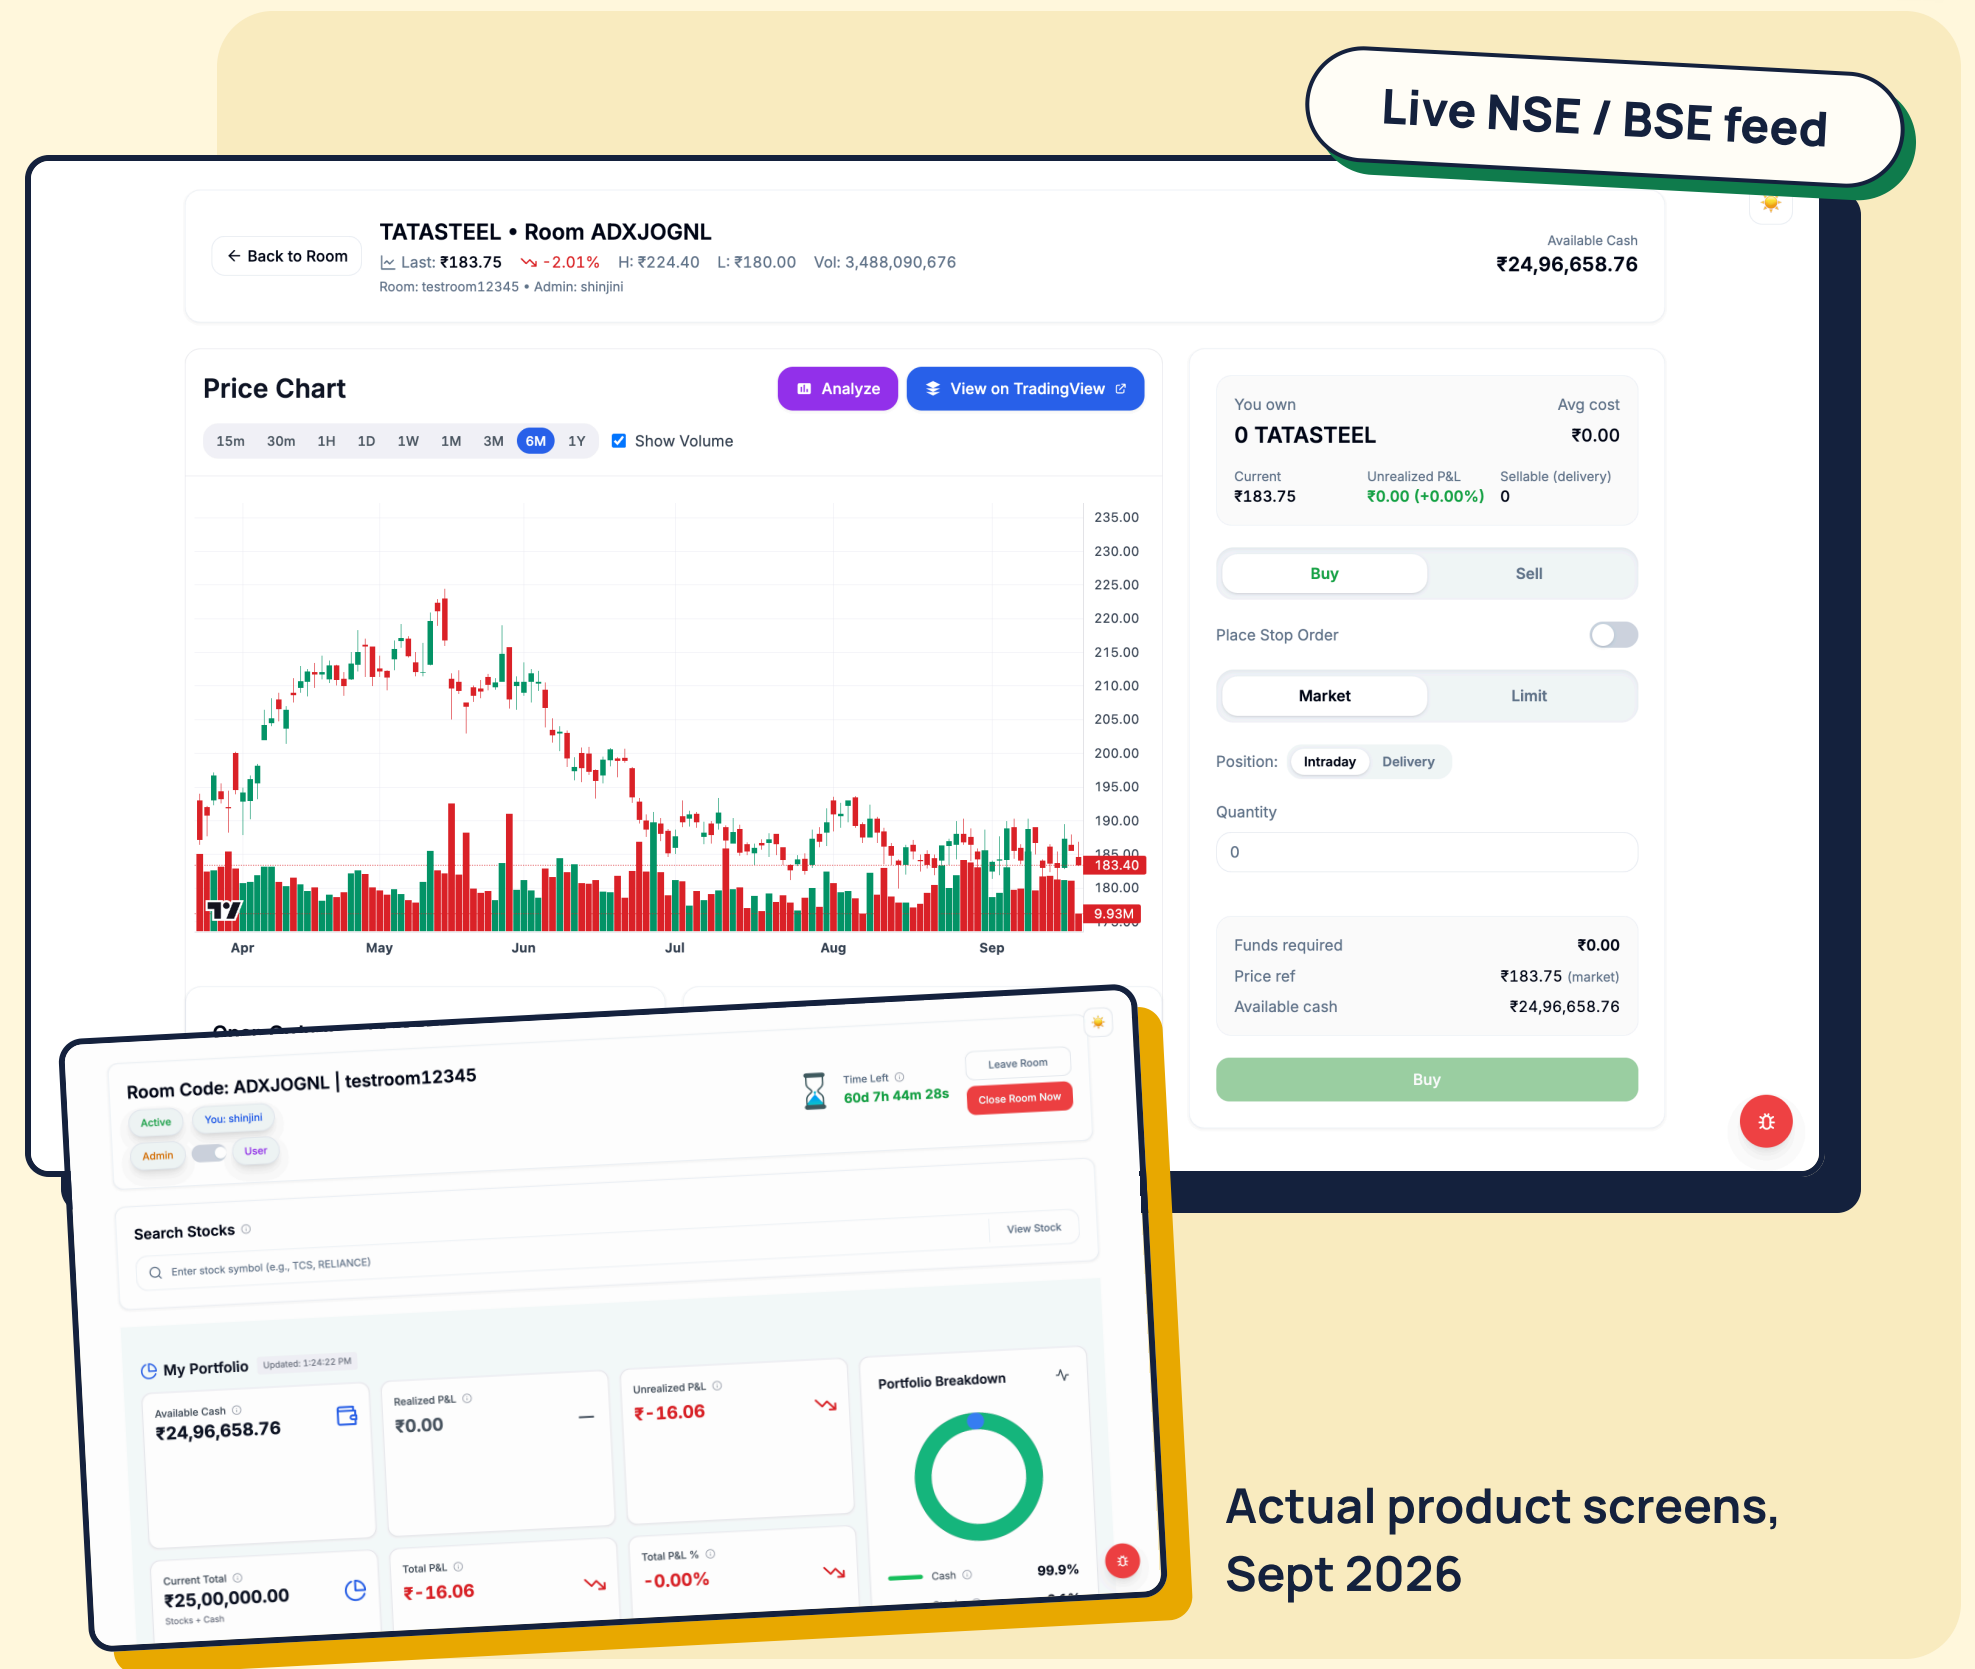

● 89 lost money ● 11 made money

THE SOLUTION

Trade the real market. Lose nothing.

- 01 Live NSE & BSE prices; the same candles a broker terminal shows
- 02 Market, limit and stop orders; intraday and delivery; long and short
- 03 Faculty host a room; every student starts with the same virtual corpus
- 04 A live leaderboard ranks the room by P&L; zero real money at risk

Actual product screens,
Sept 2026

HOW IT WORKS

One room. One corpus. One leaderboard.

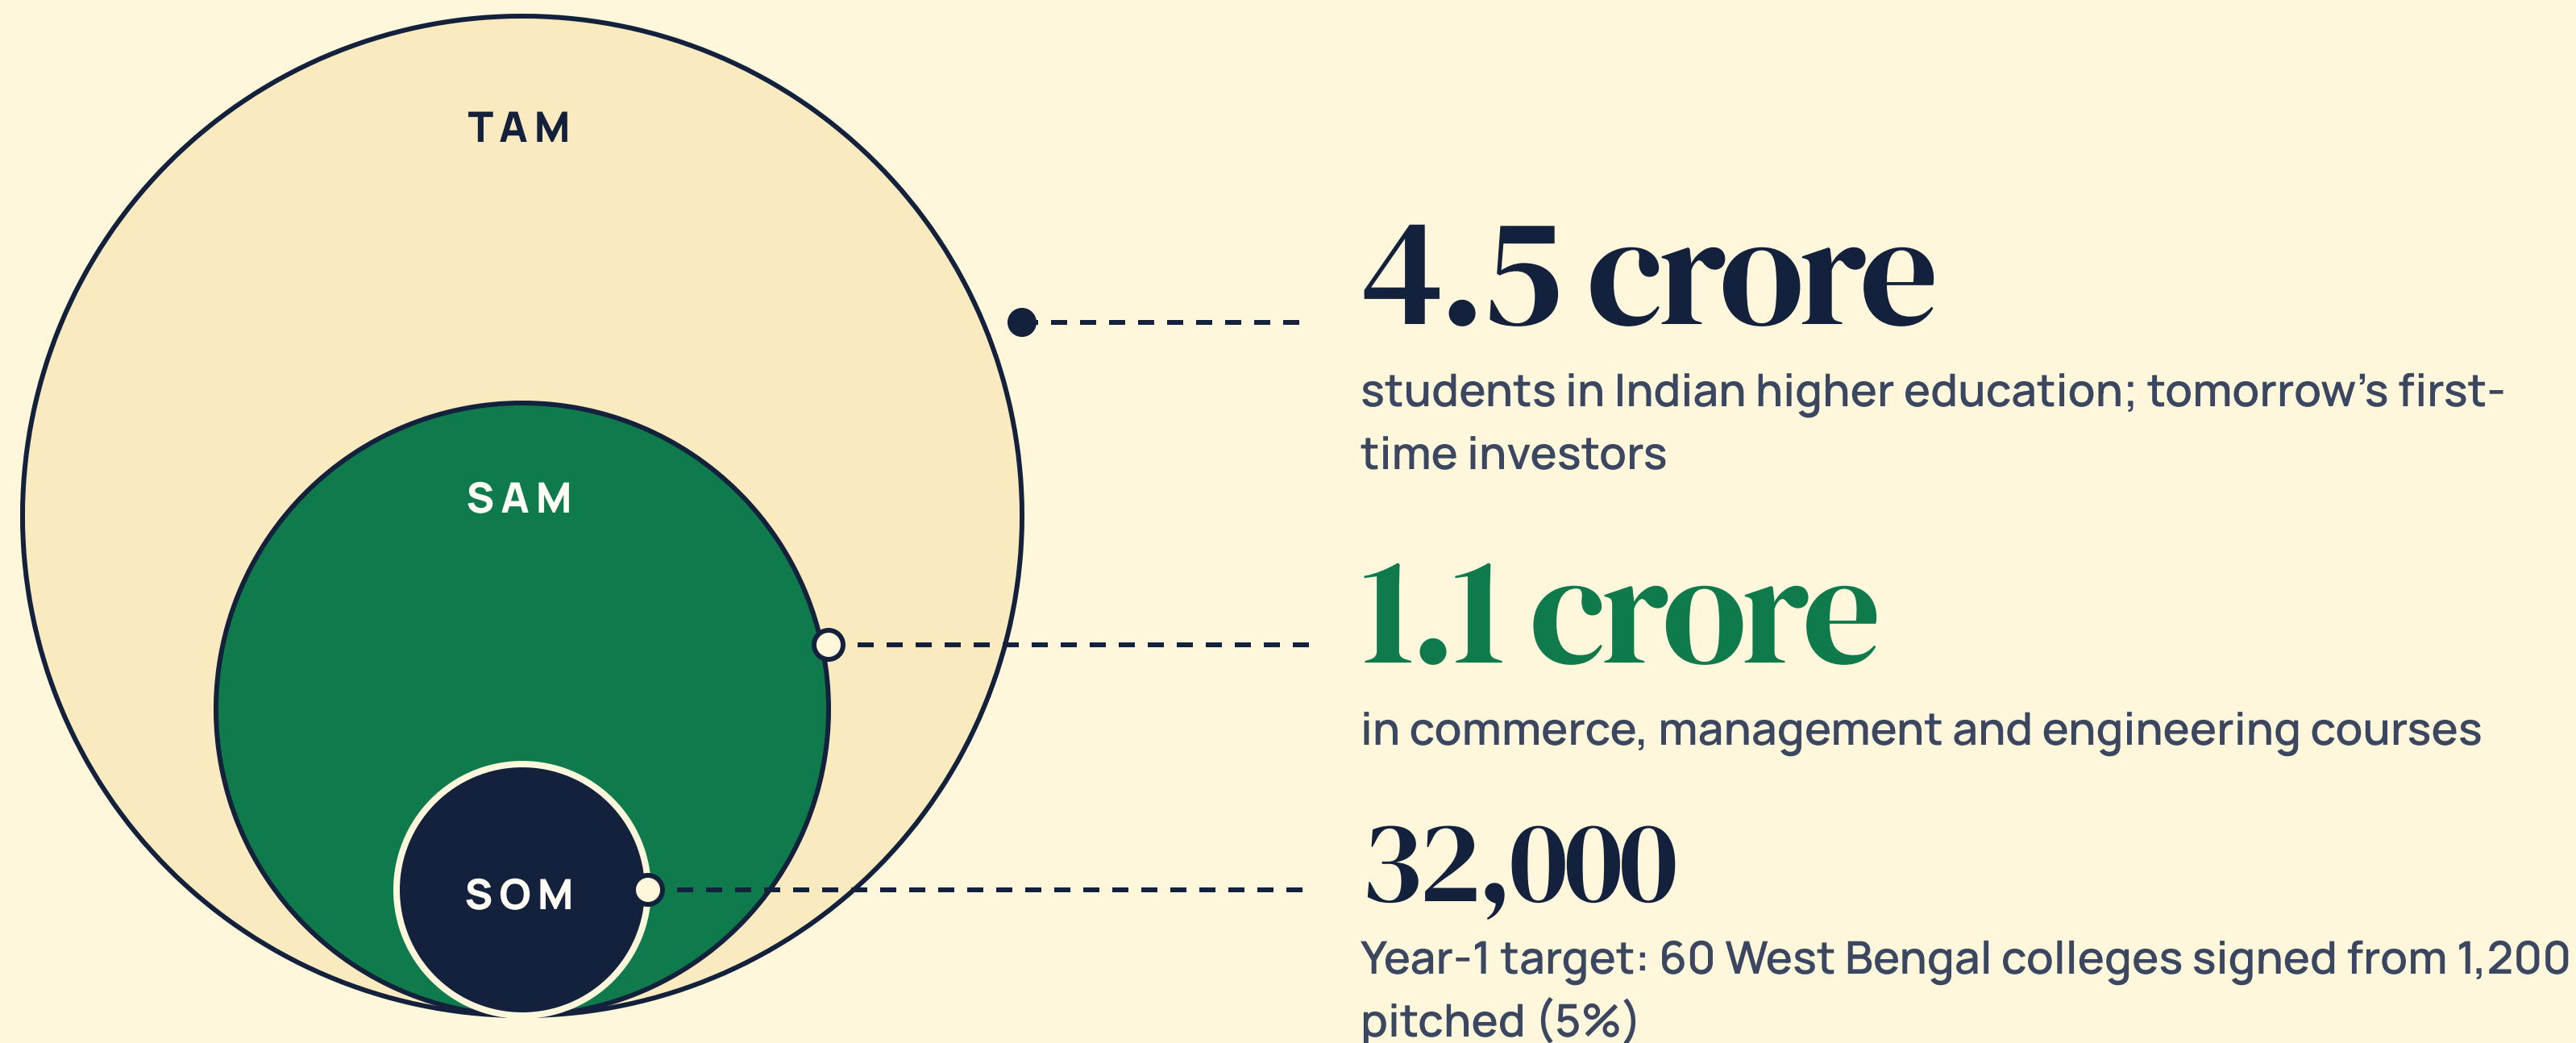

A full trading competition,
hosted by a teacher, in under
five minutes.

MARKET OPPORTUNITY

Students today. Investors next year.

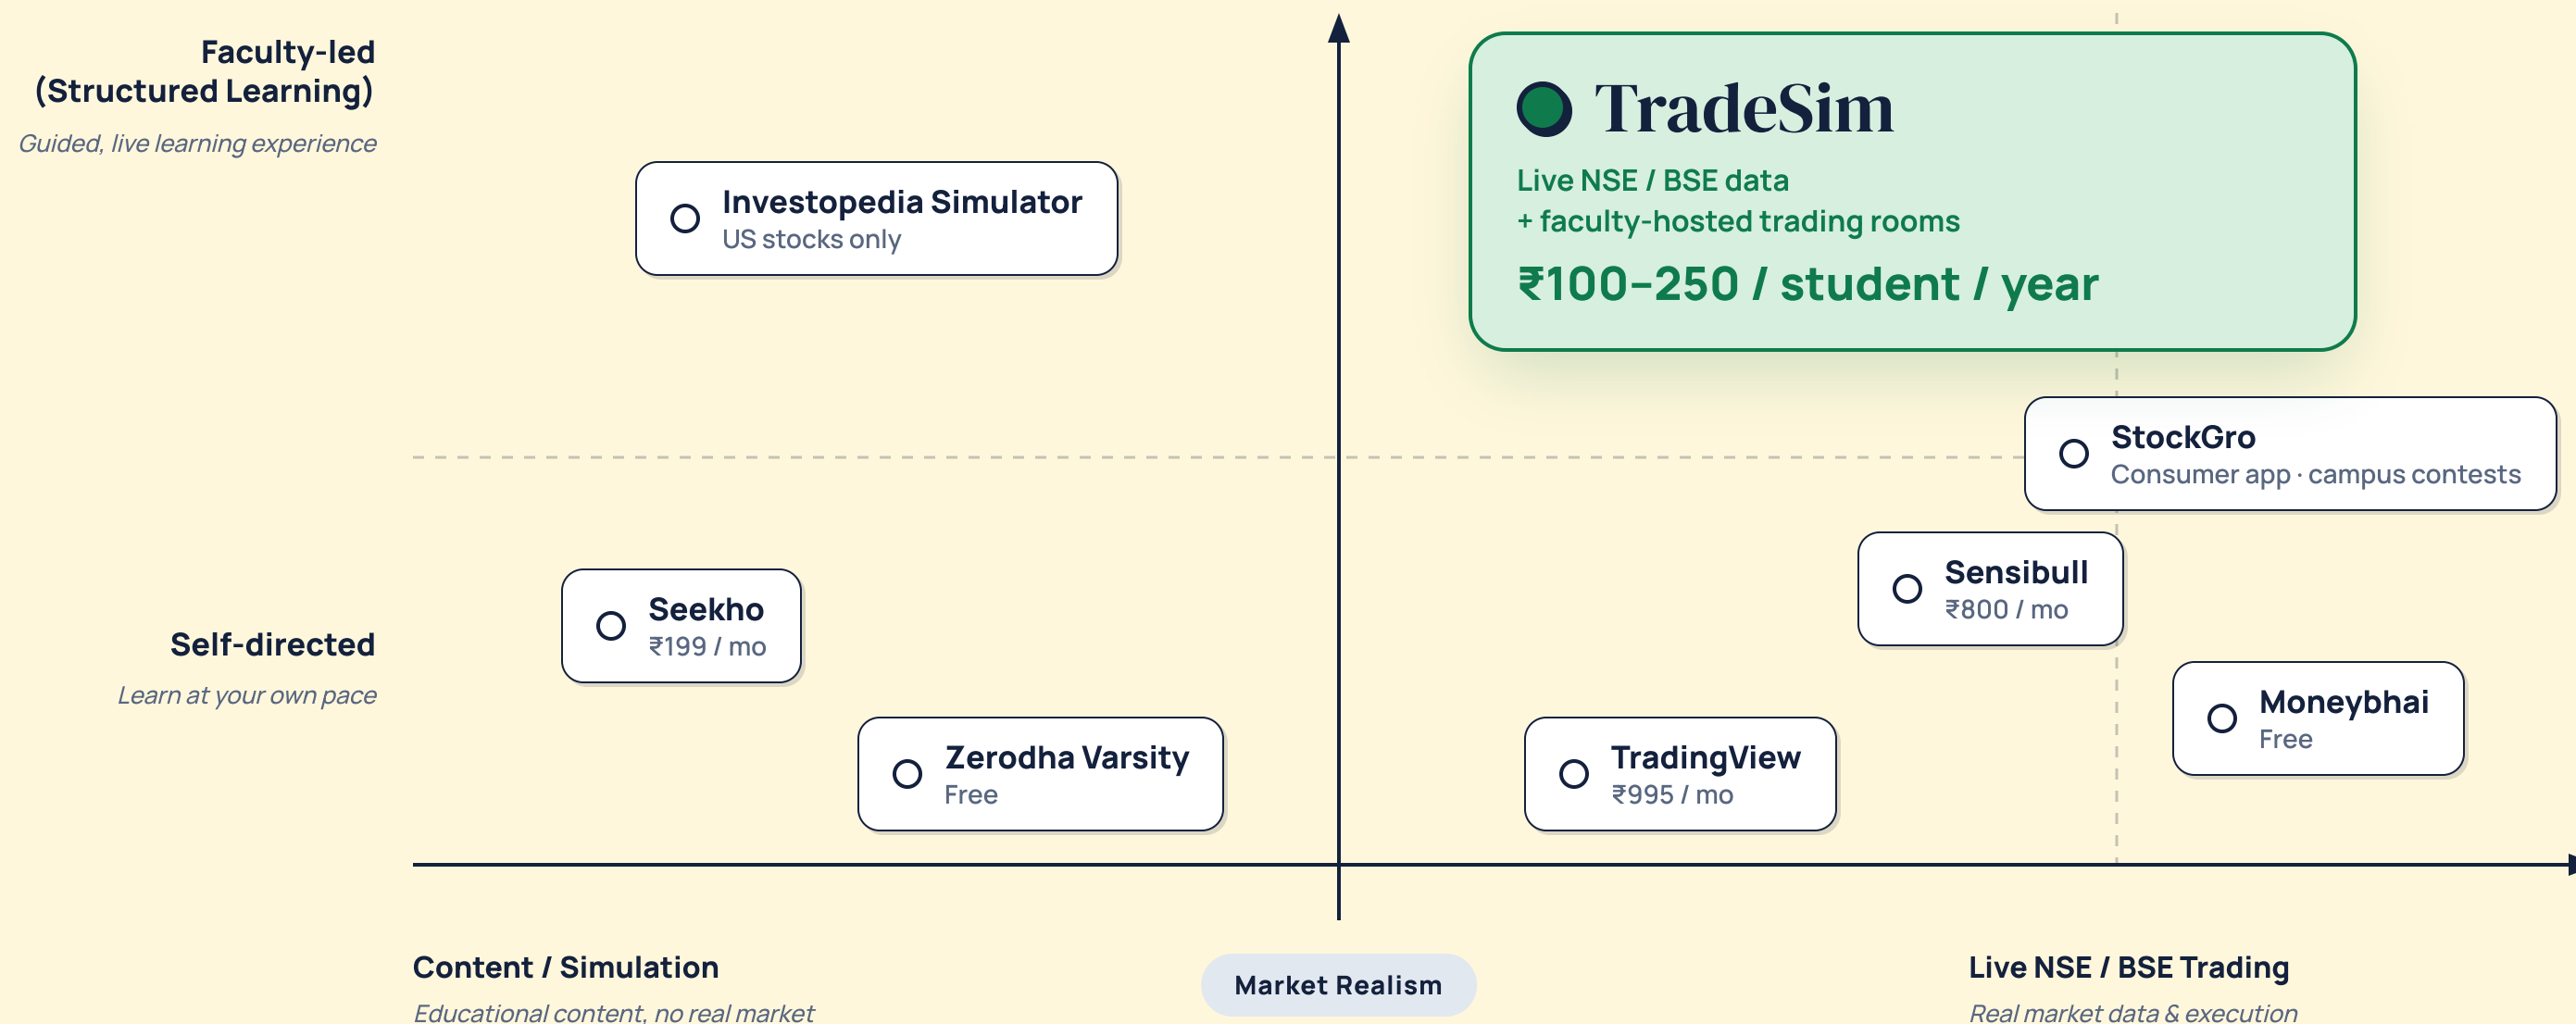

59% of new NSE investors are under 30

COMPETITIVE LANDSCAPE

Trading apps are built for traders. We built one for the classroom.

Content apps teach trading. Brokers and trading apps give market access to individuals.
TradeSim puts the live market inside a course that faculty run.

THE GAP

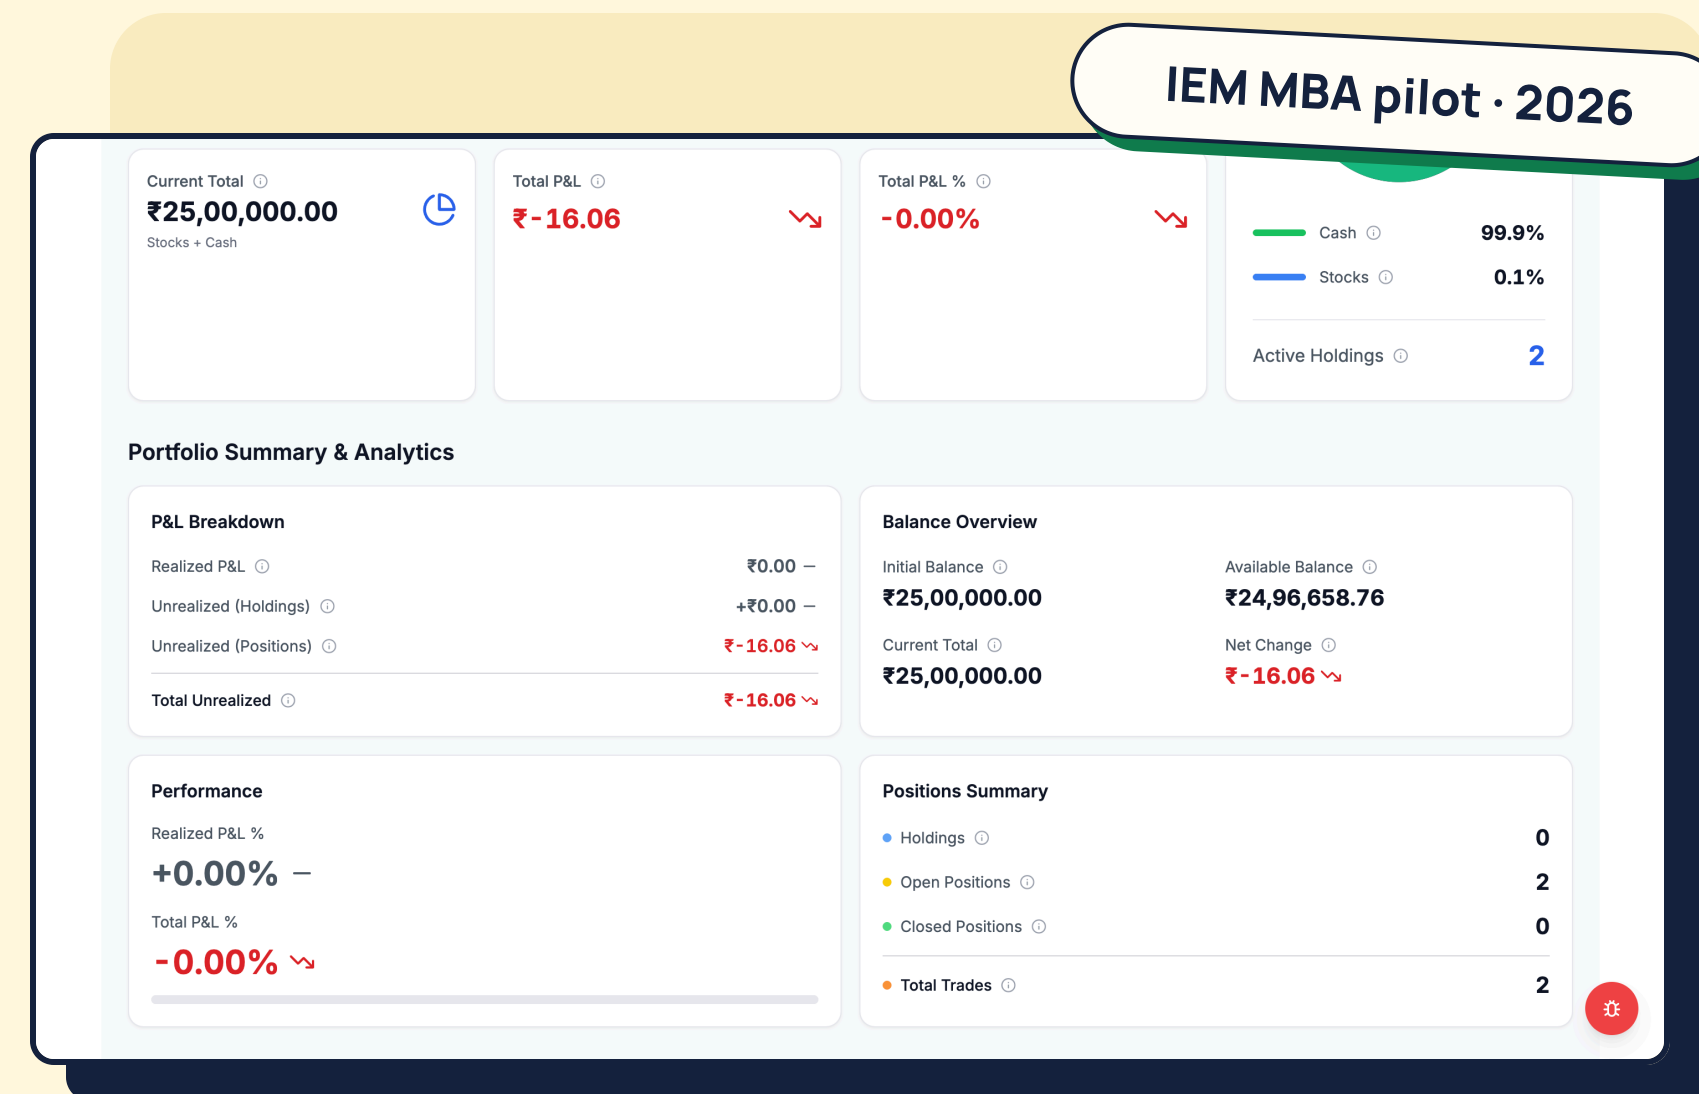

Colleges need a tool faculty can run, grade and audit, not another app for individual traders.

Brokers offer paper trading to individual accounts (Zerodha and Angel One via Sensibull). StockGro's campus contests run as events on a consumer app. TradeSim is licensed by the college and runs for as long as the course does.

TRACTION; PROOF, NOT PROJECTION

1,000+ MBA students.
One live room.
₹0 at risk.

Piloted with IEM's MBA batch on live NSE/BSE data.
The product on this screen is the product students are already using.

Live P&L, positions and analytics; every trade auditable by faculty

BUSINESS MODEL

Colleges pay. Students learn free.

Priced against Seekho (₹199/mo), Sensibull Lite (₹800/mo) and campus software at ₹99–279 per student per year.

FREE

₹0

Full simulator, live data.
Ads shown. No AI coach.

INDIVIDUAL

₹99/mo

or ₹999 a year. Ad-free.
AI trade coach when it ships. Priced below one Sensibull month.

INSTITUTION · CORE REVENUE

One yearly licence per college. Students use it free.

STARTER

₹50,000 /year

Up to 200 students · ₹250 each

STANDARD

₹75,000 /year

Up to 400 students · ₹188 each

PRO

₹1 lakh /year

Up to 750 students · ₹133 each

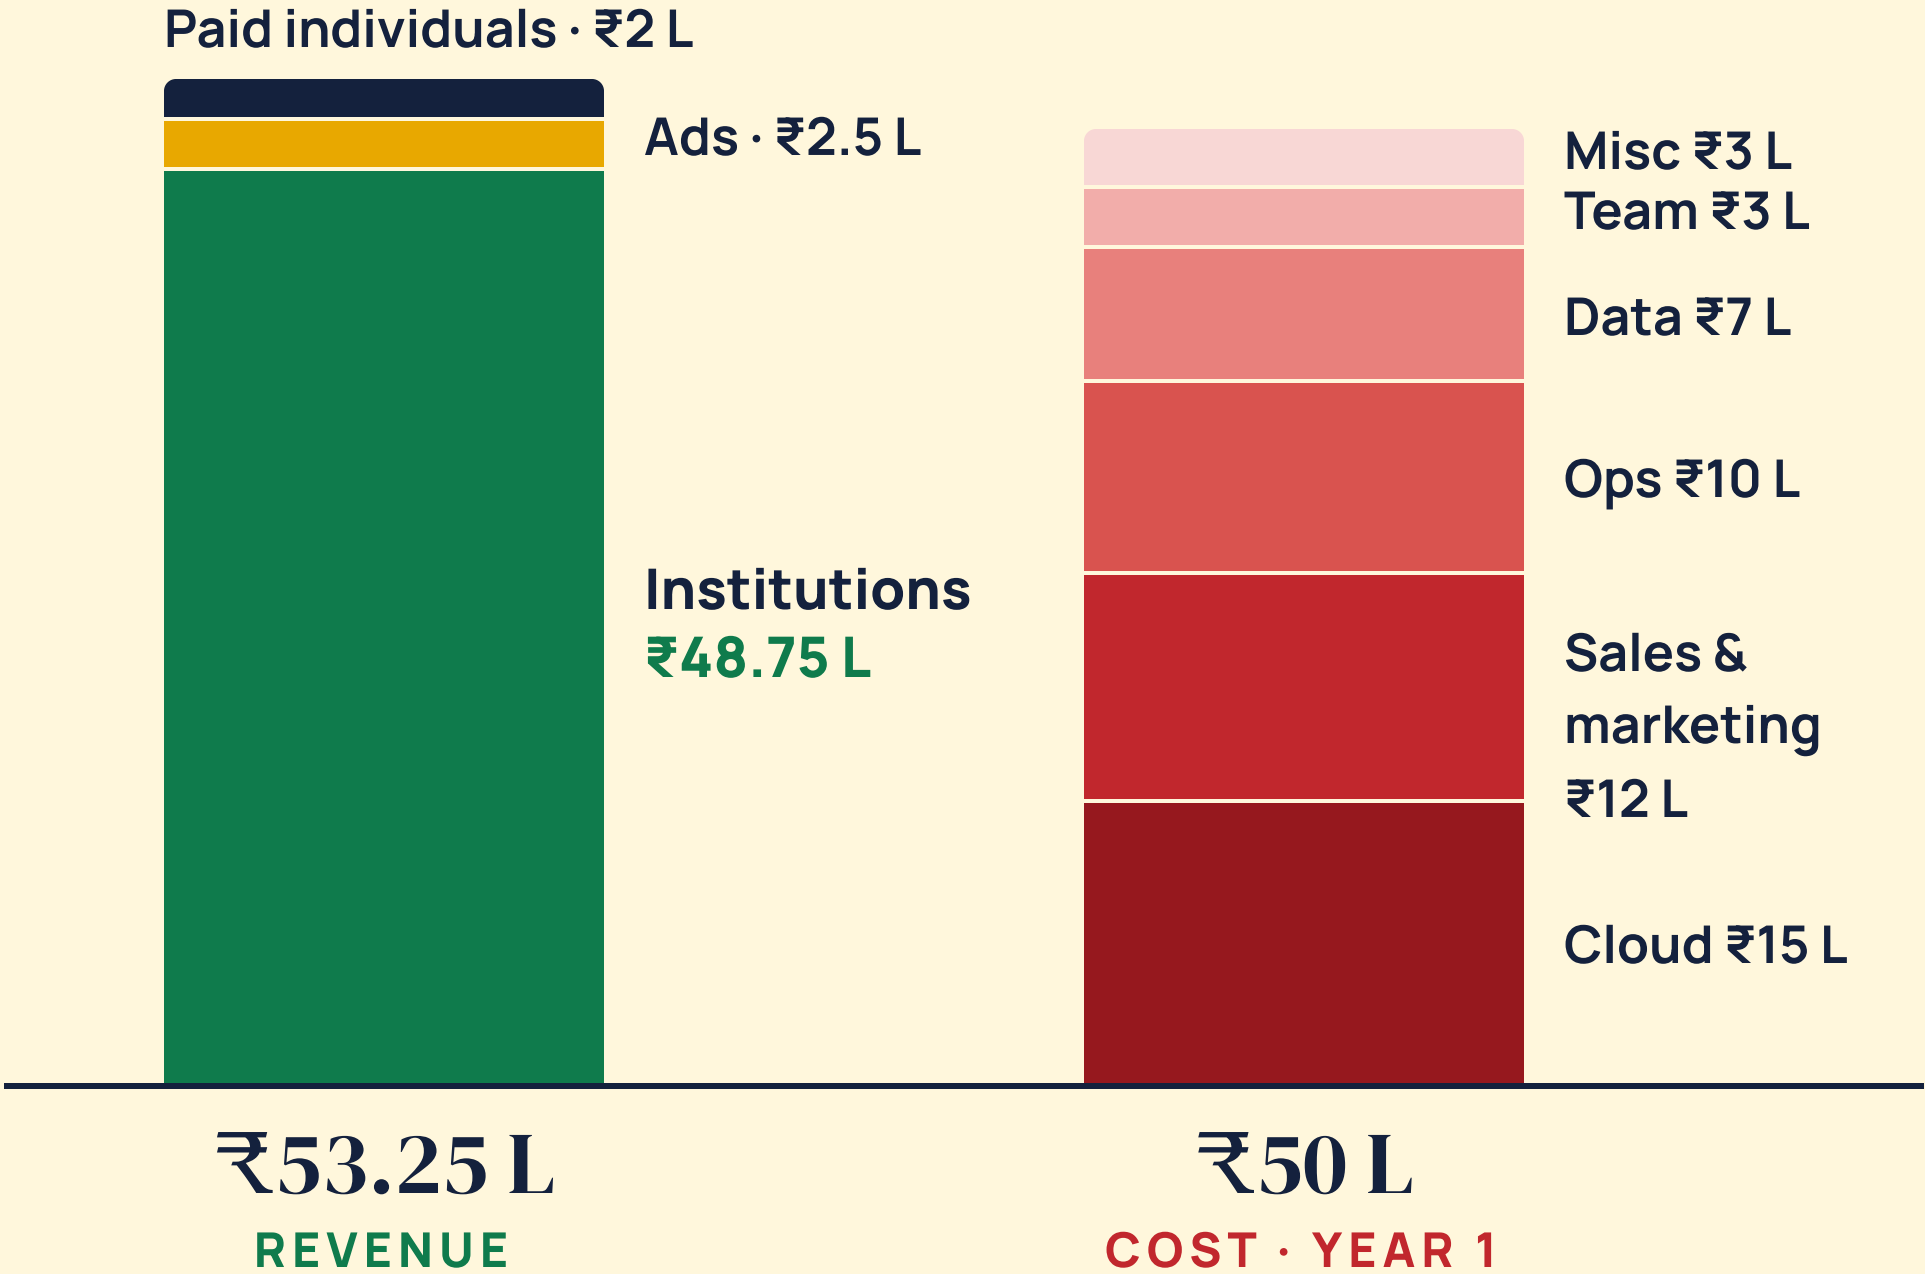

ENTERPRISE

₹2 lakh /year

Up to 2,000 students · ₹100 each

Faculty get admin rooms, cohort reports and every trade on record.

Break-even in year one. Margin on every renewal.

66%

contribution per student: ₹151
average licence – ₹52 cloud & data = ₹99

5 : 1

LTV to CAC per college: ₹1.07 L
contribution over two years vs ₹20,000 to sign

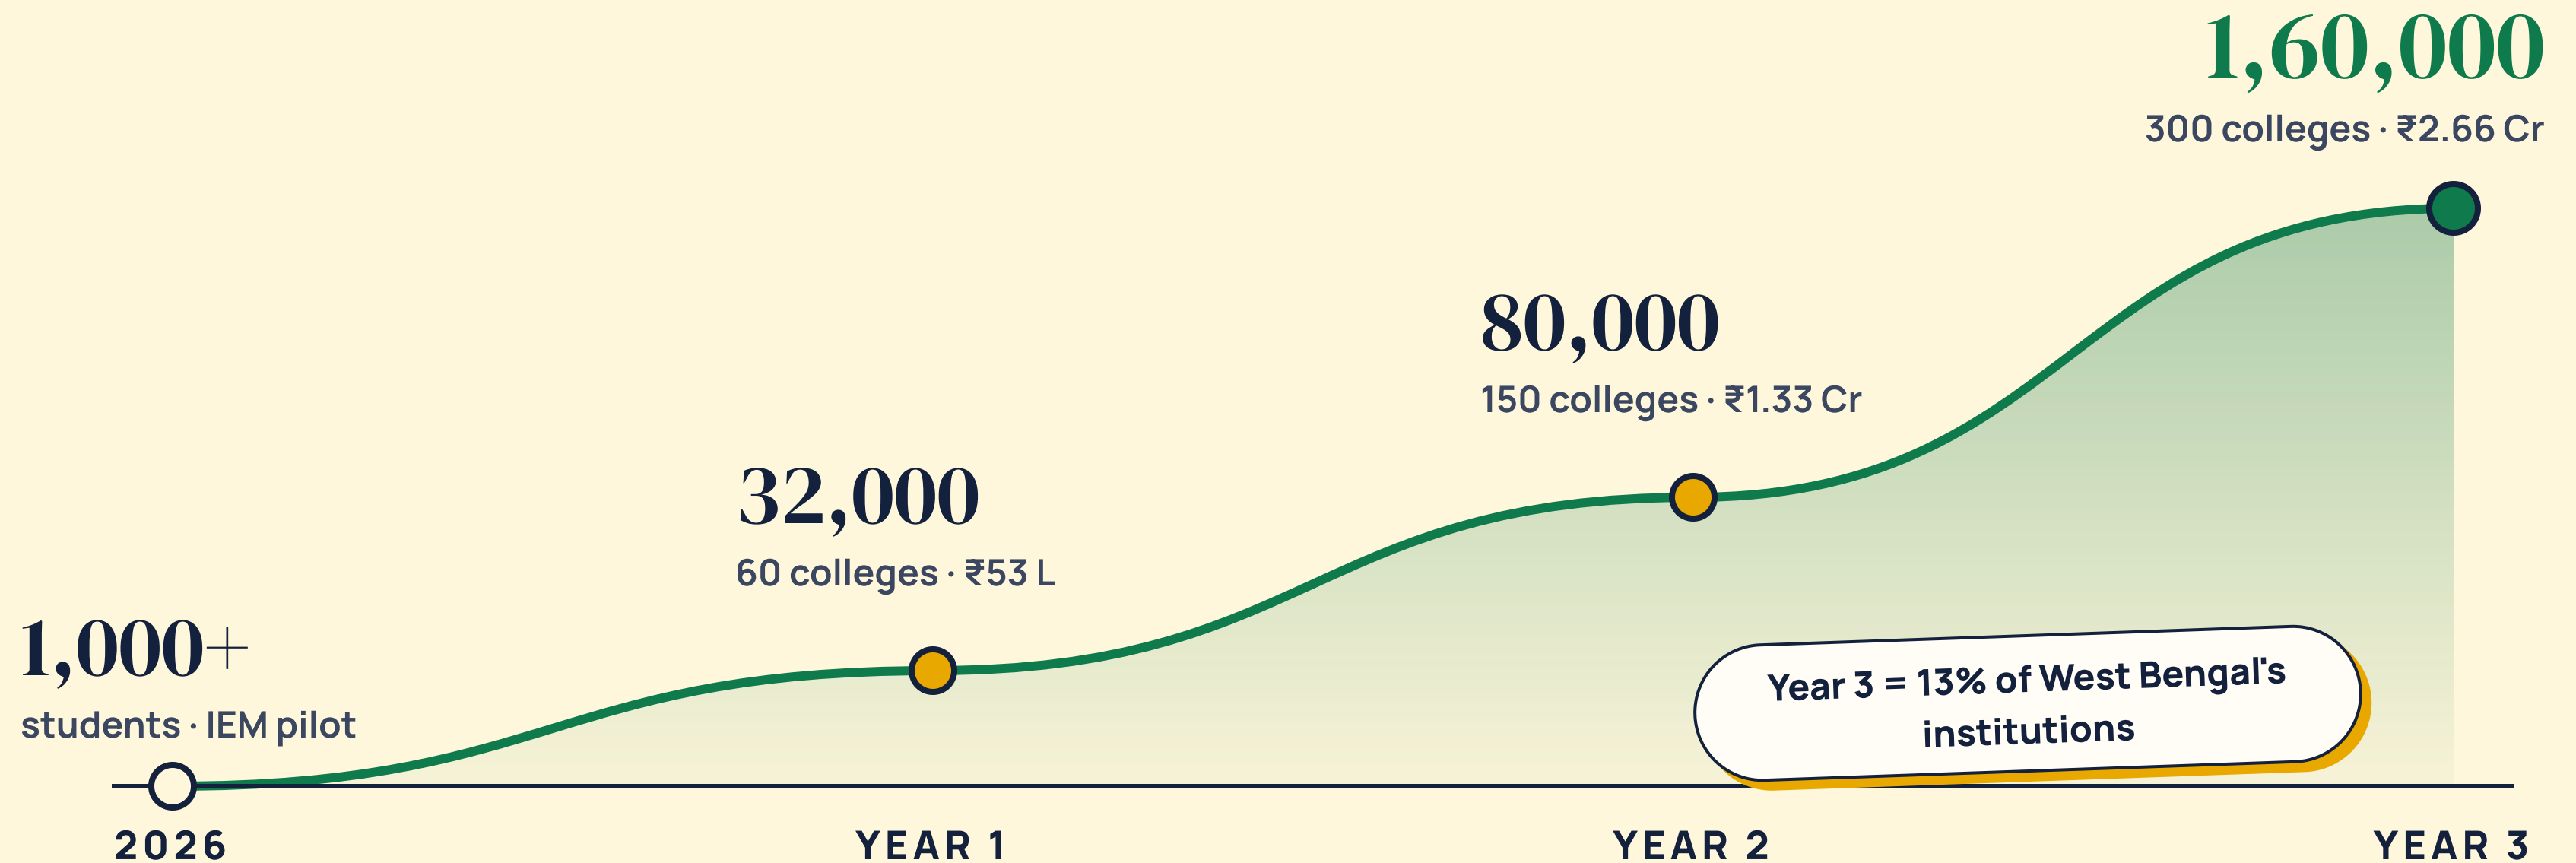

4.5

months to earn back the ₹20,000 it costs to sign a college; renewals need no new sales spend

GROWTH PLAN

One campus at a time, one room at a time.

Targets, not results. Revenue at today's prices and mix.

WHAT'S NEXT

From a simulator to a coach.

NOW · SHIPPED

Hosted competitions

Live NSE/BSE data, full order types, room leaderboard, faculty admin view. Running at IEM.

NEXT · 12 MONTHS

AI trade coach

Reviews every trade, flags the mistake, explains why in plain language. Compares you to the room. Paid tier.

LATER · 24 MONTHS

Campus analytics

Cohort dashboards for faculty, inter-college leagues, placement-ready trading records.

THE CLOSE

India learns to trade at full price. Our students learn on TradeSim first.

1,000+ students at IEM already do. Bring the next room to your campus; we set it up, your faculty runs it.

TRADESIM · IIM CALCUTTA 2026

Thank You.

Practice on the real market. **Lose nothing but the fear.**
